

La Plata Electric Association, Inc.
Interconnection/Net Metering Application
For Qualifying Facilities 25 kW or Smaller

A. System Owner Information

Name: _____

Mailing Address: _____

City: _____ State: _____ Zip Code: _____

System Address: _____

Phone: _____ Email: _____

LPEA Account #: _____ LPEA Meter #: _____

B. System Information

- **Qualifying Facility must consist of UL listed equipment that is commercially available and factory new when installed. Applicant must provide a One Line Diagram of the System.**
- **For Residential 10kW or smaller, the minimum requirement for General Liability Property Insurance is \$300,000. Applicants must provide a copy of the evidence of property insurance.**
- **For Commercial or systems greater than 10kW, refer to LPEA's Liability Insurance requirements and the "Qualifying Facility Design Requirements" must be completed. www.lpea.coop**
- **With a Renewable Energy Credit (REC) Contract for solar greater than 10 kW or for any size wind, hydro, biomass or heat recovery, the generation system is required to have a separate meter or metering source to provide "Actual Production" of the system on a monthly basis.**
- **System shall not be energized, except for testing purposes, until state electrical inspection, an LPEA inspection, and a net meter is installed (when necessary).**

Installer: _____ Phone number: _____

DC Nameplate kW Capacity: Solar _____ Hydro _____ Wind _____ Other _____

Adding to an existing renewable generation system: YES NO

Identify system size: Original _____ kW + Additional _____ kW = Total _____ kW

Inverter Manufacturer & Model: _____

Inverter Physical Location: _____

Single Phase Three Phase Estimated Install Date: _____

Estimated Monthly Dollar Savings Based on Standard Rate: _____

C. Interconnection Customer Acknowledgement

I hereby certify that, to the best of my knowledge, the information provided in this Application is true. I agree to abide by the Interconnection Standards for Cogenerators and Small Power Producers and I will return the Certificate of Completion when the Qualifying Facility has been installed.

Signed (System Owner): _____ Date: _____

D. REC Agreement

I have read the Renewable Energy Credit (REC) Contract and I
 will will not assign to La Plata Electric Association (LPEA) the Renewable Energy Credits generated by the Qualifying Facility at _____ (system address) for a term of ten (10) years based on the "Actual System Installation Information" Section B on Certificate of Completion. The REC payment amount is determined by the LPEA Renewable Generation and Environmental Attributes Policy 359.

Signed (System Owner): _____ Date: _____

E. Utility Approval

Interconnection of the above mention Qualifying Facility is approved contingent upon the Interconnection Standards for Cogenerators and Small Power Producers, the return of the Certificate of Completion, a state electrical inspection, a LPEA inspection, and the installation of a net meter (when necessary).

Signed (LPEA Rep.): _____ Date: _____

Application ID number: _____
